## Dear Tank Owner / Operator,

Phase II ever upgrade permitting and installation services  
Our company can provide you with following services:

- 1) Site survey and draw the site map and showing the repipe sketch of vent pipes, location of Healy tank from property lines, Healy, and tank closure location with crash posts. Ready Structural calculations as per CBC 2007 for both Healy and tank closure.
- 2) Submittal and pulling permits from local air district, fire department, and building safety. Coordinating the installation and final AQMD performance test.
- 3) Coordinating purchasing and storage of equipment
- 4) Financing A-Z cost of project through gas station capital leasing company
