

**R**amtox Corporation is an environmental consulting firm with an 18-year track record in environmental management and consulting of numerous small to large size chemical manufacturing companies. Ramtox was established in 1986 by a group of consultants with specialties in a wide variety of areas such as environmental chemistry, regulatory compliance, geology, and environmental engineering. Since establishment, our technical staff has assisted clients in multi-disciplinary environmental fields. These fields include environmental site assessment and regulatory environmental, health, and safety compliance affairs. Our mission statement is to providing turnkey regulatory consulting services in order to fulfill year-round clients' compliance requirements mandated by local, state, and federal regulatory agencies.

## ▲ Environment Management Software

The key element in reporting and management of EH&S affairs of an organization depends on having an integrated software module system that can produce reports and flag out the FORM R, VOC, and proposition 65 compounds instantaneously. Accessing on-line of this kind of software system has advantages such as:

- Rapid access of MSDS by name, location, CAS#, and hazardous ingredient.
- Sorting the hazard rating, quantity and storage location, flagging FORM R, proposition 65, Tier I, and Tier II reporting compounds.
- Producing current environmental compliance reports
- Managing hazardous waste manifests, labeling, and managing the costs associated with disposal and environmental fees.
- Tracking emissions under permitted devices periodically for compliance issues.

## ▲ Health and Safety Consulting & Services

- The magic of safety incentives
- Change of attitude in a diversified cultural environment
- Behavior approaches towards reducing OSHA recordables, and providing safework environment
- maintaining log OSHA 200 and associated accident investigation records.
- Preparation of hazard communication program and training
- Preparation of illness and injury prevention program, and implementation of the program
- Cal/OSHA safety training manual
- Updating and managing Material Safety Data Sheets
- Computerizing Material Safety Data Sheets
- Safety training manuals and training documents: lockout/tagout, machine guarding, personal protective equipment, hazard communication, Material

rial Safety Data Sheet guidelines, hearing conservation, safe lifting, forklift, and fire prevention, illness & injury prevention program, job hazard analysis.

- Safety audit and inspections

## ▲ Wastewater Environmental Engineering Services

- Treatment system evaluations
- Wastewater system renovation
- New system design and installation
- System start-ups and troubleshooting
- Process engineering
- Waste minimization studies
- Sludge disposal studies
- Treatability studies using proprietary chemicals to meet stringent discharge limits of chromium, copper, zinc, and silver.
- Annual surcharge fee reduction studies

- Operator & management training of waste water treatment operation
- Wastewater treatment technology assessment
- Specialty chemicals to remove odors from wastewater treatment plant

### ▲ Environmental Management System

- ISO 14000 EMS Program design & implementation
- Coordinating of registration through a third party registrar
- Continual improvement of the EMS

### ▲ Environmental Site Assessment

- Environmental property risk assessment
- Phase I environmental site assessment

- Phase II subsurface investigation
- Coordinating Phase III remedial project
- Asbestos & lead inspection

### ▲ Nationwide and International Shipping Hazardous Materials

- Managing and coordinating nationwide shipping dangerous goods utilizing reputable and insured carriers
- Specialized in shipping dangerous goods in petroleum and chemical industries
- Packaging, marking, and labeling hazardous materials
- Assigning proper UN and shipping description
- Coordinating shipping of bulk and non-bulk hazardous materials via air, land, and sea
- Filing and signing off dangerous goods shipping bills on behalf of shipper

### ▲ Hazardous waste management and source reduction

- Pollution prevention studies for increase of profitability
- Managing hazardous waste as a product under "Excluded Recyclable Materials"
- Evaluation and economic assessment of treatment technologies
- Declassification of hazardous waste
- Application of certified treatment technologies by Cal/EPA
- SB-14 Source Reduction Program

### ▲ Air Pollution Control and compliance beyond 2000

- New Challenges of meeting Clean Air Act regulation for reduction and control of hazardous air pollutants especially:
- RULE 461 periodic compliance inspection

- 
- Particulate matter
  - SO<sub>2</sub>, NO<sub>x</sub>, Hazardous Air Pollutant, and VOC emissions
  - Assessment and application of air pollution control technologies in chemical industries

#### **FORM R**

- Applicability of EPCRA section 313 reporting
- Threshold determination
- Annual Toxic Release Inventory Report to EPA Form R

#### **▲ Hazardous waste**

- Biannual Hazardous Waste Reports
- Hazardous Waste Minimization Program/Source Reproduction Program
- Maintenance of manifests
- Hazardous waste generator fee
- Hazardous waste permit

- Hazardous waste biannual report
- Excluded recyclable material compliance and certification letter
- SB-14 Source Reduction Program

#### **▲ Hazardous Material Activities**

- Annual business plan updates
- Facility sit plan
- Chemical inventory updates

#### **▲ Environmental Audit**

- 49 CFR audit program
- 40 CFR audit program
- Title 22 California Code of Regulations

#### **▲ Health & Safety Audit**

- 29 CFR audit program
- Title 8 California code of Regulations
